

SKYLIGHT PRI-50 INTENSE

Bring more **colour** to your **planted** vivarium!

FEATURES

LOW HEAT

INTENSE COLOURS

PHOTOSYNTHETICALLY ACTIVE RADIATION

COLOUR TEMPERATURE ADJUSTMENT

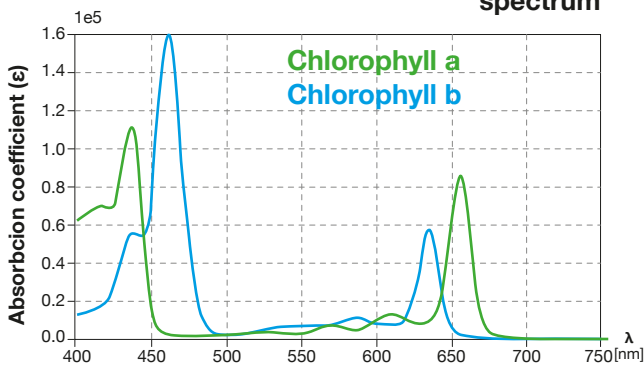

DIMMABLE

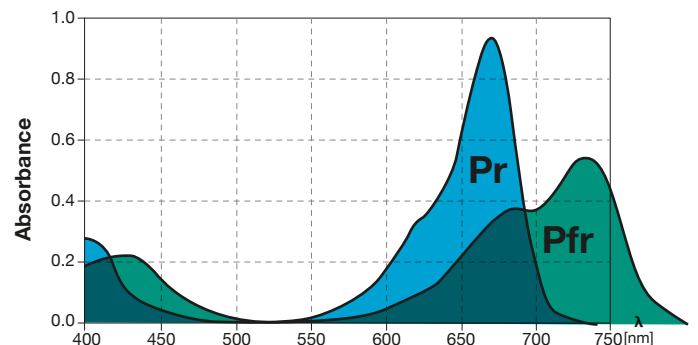

SKYLIGHT PRI-50 lamp is the most powerful among the skylight vivarium dedicated lamps. It is built around an RGB core to provide a very high colour saturation revealing vivid colours of terrarium inhabitants. Spectrum has been extended down to violet light and up to deep red light and close IR to trigger physiological processes in plants in a most natural way possible and support the healthy growth of various plants.

Lamp is dimmable and allows for control of the colour temperature (warmer or cooler tone can be set).

PARAMETERS

Power rating:	48 W
Luminous flux:	3600 lm
Colour temperature:	7000 K
Voltage rating:	12 V DC
Current rating:	4 A
Recommended terrarium dimensions:	50x50x80 cm
